                                                                                                                                                                                                                                                                                                                                                                Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                              Description
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Sequence

Patent No. 6630334

GENERAL INFORMATION:
GENERAL INFORMATION:
APPLICANT: GENERAL Xarl et al
APPLICANT: GENERAL XARL
TITLE OF INVENTION: ISOLATED HUMAN KINASE PROTEINS, NUCLEIC
TITLE OF INVENTION: ACID MOLECULES ENCODING HUMAN KINASE PROTEINS, AND USES
TITLE OF INVENTION: THEREOF
FILE REFERENCE: CL001067

CURRENT APPLICATION NUMBER: US/09/751,389

CURRENT PILING DATE: 2001-01-02
